

# SUSTAINABILITY CHALLENGE

*Comfi Spaces*

Just the Place for You

Our World is our home. Let's protect it!

# Comfi Spaces

Just the Place for You

Comfi Spaces is committed to supporting the sustainability of our planet. During your stay with us we are asking for your support in protecting/conserving the following resources.

**Water** – Value water as a natural resource and use it efficiently and effectively. Manage usage when doing dishes, laundry and taking showers. We practice rain water harvesting which is used for the garden.

**Energy** – We aspire to transition to renewable energy. Even then, its important to effectively utilize appliances to minimize energy waste. Turn AC and fans off when out. Do not leave heaters plugged in for extended periods. As part of our commitment there are no dryers, the only option is to line dry clothes.

**Waste** – Manage waste to reduce or eliminate greenhouse gas emissions. Cook inhouse. If going out support vendors that utilize recyclable or biodegradable packaging. Carefully dispose of waste at end of visit.

**Sea & Forest Health** – When visiting the beaches and taking nature walks through the various trails, please be responsible stewards. Leave a minimal foot print. Walk with plastic bags where necessary to collect waste generated.
